Subject
Suspension of CE-136

Dear Mr. Caimi,

In February 2010 Itron Italia S.p.A. applied to NMI for approval of its quality system for conformity assessment of Volume Conversion Devices according to conformity assessment procedure module D of the Directive 2004/22/EC. An initial assessment was performed on 9 March 2010 at the premises of Itron Italia S.p.A. to verify compliance of the quality system with the criteria of the directive. On basis of this assessment NMI approved the quality system with certification number CE-136 on 7 May 2010.

Based on the discussion you had with my colleague, Mr. Yvo Vermeul on 16 November 2020, to temporarily suspend your certificate the Certification Board of NMI Certin B.V. decided to grant the suspension retroactively from 30 November 2020 of the certification with number CE-136 of Itron Italia S.p.A..

According to Annex D item 7 of the directive, NMI shall inform its authorities and ask them to inform the Member States of the EU about its decision.

The suspension will last until 7 May 2021 as maximum. If no new audit is scheduled before this date the certification will not be continued after 7 May 2021 and your Module D Certification will be withdrawn.

In case you wish to continue your certification prior to the expiry of certificate CE-136 (so prior to 7 May 2022) then an audit needs to take place. First to verify whether the quality system as previously approved is still in place. Depending on when your company re-applies, either a surveillance audit or initial audit will be performed.

If you have any questions, please don't hesitate to contact Mr. Boudewijns, Manager Certification Board.

With kind regards,
NMI Certin B.V.

M. Boudewijns
Manager Certification Board
